# LM Actuator Model GL

## Structures

### Ball Screw

Figure 1 Ball Screw Type Structure

### Timing Belt

Figure 2 Timing Belt Type Structure

Note: If the Model GL with timing belt is mounted vertically, the carriage may drop. Please contact THK for further details.

## Features

Lightweight, high rigidity aluminum base with LM Guides model GSR has been utilized for the guide portion. A screw or belt options are available for the drive system.

### Enables manufacturing of actuator that corresponds to it use

Allows you to manufacture the actuator that matches your specifications because you can select the parts. Both the pre-assembled parts and part kits are available for purchase.

### Short delivery time

All parts are standardized to enable manufacturing with short delivery times.

### Drive System

#### [Ball Screw Type]

Variety of screw leads can be selected.

Table 1 Ball Screw Leads by Model Numbers

Model number	Ball Screw lead [mm]
GL15	5, 16, 30
GL20	5, 20, 40

#### [Timing Belt Type]

Highly rigid timing belt ensures that high speed processes are possible for longer stroke (max. 2720 mm) applications than the Ball Screw driven type.

Table 2 Pitch Diameter of the Timing Pulley

Model number	Pitch diameter [mm]	Slider move distance [mm] per pulley rotation
GL15	35.01	$35.01 \times \pi \approx 110$
GL20	38.20	$38.20 \times \pi \approx 120$

Note: Because the timing pulley has a large pitch diameter, the use of a reducer is recommended.

Figure 3 Slider move distance per pulley rotation

### Lightweight and High Rigidity

By using a hollow aluminum extrusion, light weight and high rigidity is achieved.

Table 3 Geometrical Moment of Inertia and Weight in the Base

Model number	Geometrical Moment of Inertia		Weight [kg/m]
	Ix [mm <sup>4</sup> ]	Iy [mm <sup>4</sup> ]	
GL15	$2.0 \times 10^5$	$2.7 \times 10^6$	5.1
GL20	$4.62 \times 10^5$	$4.62 \times 10^6$	6.8

Figure 4 Base Section

## ● Specification

Model number		GL15				GL20			
Drive system		Ball Screw		Belt		Ball Screw		Belt	
Screw lead	[mm]	5, 16, 30		—		5, 20, 40		—	
Pulley pitch diameter	[mm]	—		35.01		—		38.20	
Repeatability <sup>Note 1)</sup>	[mm]	±0.02		±0.08		±0.02		±0.08	
Effective stroke <sup>Note 2)</sup>	[mm]	100 to 1180		70 to 1720		200 to 1520		150 to 2720	
Applicable LM Guide		GSR15V	GSR15T	GSR15V	GSR15T	GSR20V	GSR20T	GSR20V	GSR20T
Note 3) Rated moment load	MA	60.9	67.7	90.7	134.1	137.0	173.9	117.0	157.3
	MB	46.5	52.0	69.3	102.3	104.0	132.1	88.6	119.2
	MC	61.8	77.2	91.7	123.3	117.0	152.8	103.6	137.2

Note 1: This repeatability is ensured at an ambient temperature of 20°C.

Note 2: The effective stroke decreases depending on the table length. See the dimensional drawings (P.5 to 10) for stroke details.

Note 3: The rated moment load refers to the moment in each direction obtained when the life travel distance of the LM guide is 5000km. For the ball screw drive, the rated moment load is the minimum loaded moment calculated under the conditions of the maximum moving speed per lead and an acceleration of 0.3G.

Figure 5 Direction of rated moment loads

- MA** Moment in the pitching direction
- MB** Moment in the yawing direction
- MC** Moment in the rolling direction

## ● Maximum Travel Speed

### [Ball Screw Type]

Ball Screws have an allowable rotational speed based on the DN value and the critical speed. The table travel speed [mm/s] of the LM Actuator depends on the rotational speed of the Ball Screw and the rated rpm (3000 min<sup>-1</sup>) of the AC servo motor.

#### Maximum travel speed

Unit: mm/s

Model number		GL15			GL20		
Ball Screw lead		5	16	30	5	20	40
Base length	340	248	800	1500	—	—	—
	460	248	800	1500	202	1000	2000
	580	248	800	1500	202	1000	2000
	700	248	800	1500	202	1000	2000
	820	248	800	1500	202	1000	2000
	1060	214	706	1215	202	1000	2000
	1240	148	488	834	190	786	1573
	1420	108	357	610	140	573	1146
	1600	—	—	—	106	436	873
	1780	—	—	—	84	343	686

Note: The LM actuator may not reach the maximum travel speed if the moving distance is short.

### [Timing Belt Type]

The table shown below summarizes the table travel speed [mm/s] of when the LM Actuator is equipped with a reducer and the AC servo motor is operated at a rated rpm (3000min<sup>-1</sup>).

#### Maximum travel speed

Unit: mm/s

Model number	GL15			GL20		
Reduction ratio	1/3	1/5	1/9	1/3	1/5	1/9
Maximum travel speed	1833	1100	611	2000	1200	667

# Configuration of Numbers

The following shows the numbering of model GL.

## [Pre-assembled Part]

GL15–082–T4–L–B30–P–J–ASSY

1      2      3      4      5      6      7      8

## [Kit Part]

GL20–070–T4–L–E–C–KIT

1      2      3      4      5      7      8

Note: If you have ordered kit parts, we will deliver all parts together.

1	<b>Model Number</b>	GL15/GL20
2	<b>Base Length</b>	034: 340 mm to 300: 3000 mm
3	<b>LM Block Code</b>	V4: Short Type T4: Long Type

## ● End Plate Dimensional Drawing (Ball Screw Specifications)

Note: When attaching the motor, please process the end plate, or contact THK for further details.

## ● Dimensional Drawing of Cover

Note 1: Deflection of the cover increases as the base length increases. A cover-support is attached to the table to prevent table interference. This is attached as standard from models with base lengths above 1000 mm. The cover may touch another part such as the rail and belt, because deflection caused by the cover's own weight increases.

Note 2: If the GL model is used in any position other than horizontal, a part mounted on the table might touch the cover due to deflection caused by the cover.

## ● Dimensional Drawing of Plate Nut for Base Mounting

Base length: mm	340	460	580	700	820	1060	1240	1420
n	4	4	6	6	8	10	10	12

## Service Life Time and Static Safety factor

The GL model consists of LM Guides, a ball screw, and support units. The life and safety factor of each component can be calculated from the basic dynamic load rating and the basic static load rating. For more information on these, refer to each item (LM Guides, ball screws, and support units) in the general catalog.

The nominal life of the LM Guides and ball screw can be calculated using the technical calculation software available from the THK Technical Support Site (<https://tech.thk.com/>) or contained in the CD-ROM catalog. In calculating the nominal life, see the data in the following table.

Note: Please note that the calculation of life is theoretical. In actual use, the life varies depending on the service conditions such as the usage environment, the lubricating condition, the accuracy or rigidity of the area where the LM actuator is installed, and so forth.

### [LM Guide]

Actuator model number	Table type	LM Guide model number	Thrust position		Rail span W [mm]	Block span L1 [mm]	Movable section				Slider height H [mm]

LM Guide model number symbol	Movable section mass [kg]	Sliding resistance [N]
GL15-***-V4-S	1.4	10.0
GL15-***-V4-L	1.7	10.0
GL20-***-V4-S	2.6	12.4
GL20-***-V4-L	3.0	12.4

Allowable input torque* <sup>3</sup>	
Nominal model number	[N·m]
GL15	2.8
GL20	5.3

\*<sup>1</sup> The base length shows the minimum and maximum lengths.

Example: 034 for a base length of 340mm and 142 for a base length of 1420mm

\*<sup>2</sup> The length of a ball screw shaft is the length available for the direct-mounting specification. For the wrap-around specification, the length of the ball screw shaft is 74mm longer for the GL15 model and 78mm longer for the GL20 model.

\*<sup>3</sup> The allowable input torque is the value for the direct-mounting specification. For the wrap-around specification, contact THK.

### [Belt Specifications]

Actuator model number	Belt		Timing pulley			
	Model number	Mass* [kg]	Model number	Diameter (PCD) [mm]	Table moving distance /one turn of pulley	Moment of inertia (total of two pulleys) [kg·cm <sup>2</sup> ]
GL15	025-MA5	0.38	22-MA5-025	35.01	110mm	0.289
GL20	025-MA5	0.58	24-MA5-025	38.20	120mm	0.447

LM Guide model symbol	Movable section mass [kg]	Sliding resistance [N]
GL15-***-V4-S	1.3	10.0
GL15-***-V4-L	1.7	10.0
GL20-***-V4-S	2.4	12.4
GL20-***-V4-L	2.8	12.4

Reducer		
Reduction ratio	Rated output [W]	Moment of inertia [kg·cm <sup>2</sup> ]
1/3	100	0.058
1/3	200	0.135
1/5	100	0.04
1/5	200	0.118
1/9	100	0.035

Allowable input torque	
Nominal model number	[N·m]
GL15	4.8
GL20	8.1

\* The belt mass is the mass for the maximum belt length.

# THK LM Actuator GL

## Precautions on Use

### Handling

- Disassembling parts may cause foreign material to enter the system or deteriorate the accuracy. Do not disassemble the product.
- Do not drop or strike this product. Doing so may damage the product. If this product is a shocked, its functions may be damaged even though it looks normal in appearance.
- Entrance of foreign material may cause damage to the ball circulating component or functional loss. Prevent foreign material, such as dust or cutting chips, from entering the system.
- When planning to use the LM system in an environment where the coolant penetrates the LM Actuator model GL, it may cause trouble to product functions depending on the type of the coolant. Contact THK for details.
- Exceeding the permissible rotational speed may lead the components to be damaged or cause an accident. Be sure to use the product within the specification range designated by THK.
- The service temperature range of this product is 0 to 40°C (no freezing or condensation). If you consider using this product outside the service temperature range, contact THK.
- When using the LM system in locations exposed to constant vibrations or in special environments such as clean rooms, vacuum and low/high temperature, contact THK in advance.
- If the product is operating or in the ready state, never touch a moving part. In addition, do not enter the operating area of the actuator.
- If two or more people are involved in the operation, confirm the procedures such as a sequence, signs and anomalies in advance, and appoint another person for monitoring the operation.

### Lubrication

- Thoroughly remove anti-rust oil and feed lubricant before using the product.
- To maximize the performance of the LM Actuator model GL, lubrication is required. Using the product without lubrication may increase wear of the rolling elements or shorten the service life. This product contains THK AFB-LF grease as standard.
- The ball screw does not have a grease nipple, apply grease directly onto the rolling surface.
- Do not mix lubricants of different physical properties.
- When planning to use a special lubricant, contact THK before using it.
- When planning to use an oil lubricant, contact THK before using it.
- In normal use, the lubricant must be replenished every 100 km as a guide. However, the greasing interval varies according to the conditions. We recommend determining the greasing interval based on the result of the initial inspection.
- In locations exposed to constant vibrations or in special environments such as clean rooms, vacuum and low/high temperature, normal lubricants may not be used. Contact THK for details. For clean room applications, low dust-generative grease is available. Contact THK for details.

### Storage

When storing the LM Actuator model GL, enclose it in a package designated by THK and store it in a horizontal orientation while avoiding high temperature, low temperature and high humidity.
